

it's all about choices

here's some questions and answers that we hope will help you decide what film best suits your needs. if you're not sure, please ask us for more information because making the right choices can help make an enormous difference to the results that you're looking for.

1

do exclusive films give you more choice?

exclusive films is our way of saying we offer product that you can't find anywhere else. in this case, we offer two films that have characteristics and performance levels that are simply not available anywhere else in New Zealand. ask in-store for details, they might be just what you're looking for!

2

how will film affect the look of my windows?

putting film on your windows is always a balance, what we mean by this is if you select 'dark' film for your windows, you will lose a proportion of light in that room. if you put external reflective film on, you'll gain more privacy.

3

how is safety + security film different?

safety film is adequate for glass sliding doors at home to help prevent children cutting themselves in the event of an accident. this film is usually three times thicker than standard films, security film is 7 times thicker and offers an almost impenetrable defence against break-ins, for example a crow-bar attack. perhaps we can arrange a demonstration for you? give us a call!

4

does film save energy + reduce power bills?

yes, there are statistics that clearly show that helping reduce heat passing through glass in summer will reduce load on air conditioners or fans, and in winter act as an insulating coating on windows. again, ask us to explain how this can work for you at home or in the workplace.

5

decorative film for home + office?

yes, definitely. this film is amazingly versatile. often these films are limited only by your own imagination. just about anything including architectural designs, opaque or frosted films on glass partitions, even your childrens artwork, company logos...all can be translated onto film.

we know there are so many questions to be asked. don't hesitate to make a list + email us or just call. you'll be surprised to learn how affordable a window film option can be to help transform your home or office.
